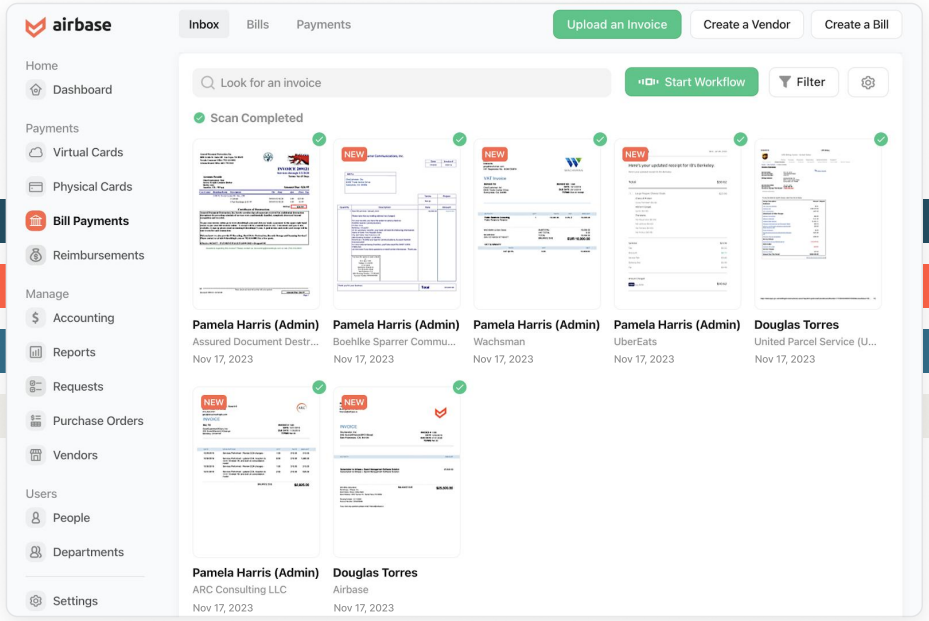
# Spend Management Platform

# Bill Payments.

AI-powered touchless AP Automation that delights your team. Choose our AP Automation product on its own or as part of our comprehensive spend management platform.



Legacy bill payment systems require unnecessary manual work and are disconnected from other payment solutions for corporate cards and expense management. This results in time-consuming reconciliations, delays the month-end close process, and makes real-time reporting across your non-payroll spend virtually impossible.

**Airbase's first-of-its-kind spend management platform solves these problems.**

AP Automation from Airbase has the bill payments functionality you expect from a best-in-class AP automation system. Use it as a stand-alone product or as part of our complete platform solution to handle all non-payroll spend. Either way, your accounts payable team will thank you.

## Benefits of Airbase AP Automation:

**Save time** by simplifying bill creation from invoices with AI-powered touchless AP technology, scheduling domestic or international bill payments, and automatically amortizing bills to your GL.

**Earn income** on your expenditures with the option to pay bills using virtual cards with cash back.

**Collaborate better** with vendors using our portal — whether they are already part of our comprehensive database, or they need to be painlessly added — and enable them to input payment information, upload contracts and tax documents, and track payments.

## Popular features:

| |
|---|
| Simple and powerful bill payments and vendor management |
| Invoice ingestion and automated bill creation with AI-powered touchless automation and line-level intelligence |
| Auto-categorization |
| Payment scheduling |
| Domestic & international payment support |
| Multiple payment types: ACH, check, vendor credits, virtual cards with cash back, international wire transfer |

> We used to go through three different systems to pay a bill. Now our bill payments go through Airbase. Once we approve, the system handles the rest. It makes the process a lot easier and more efficient.

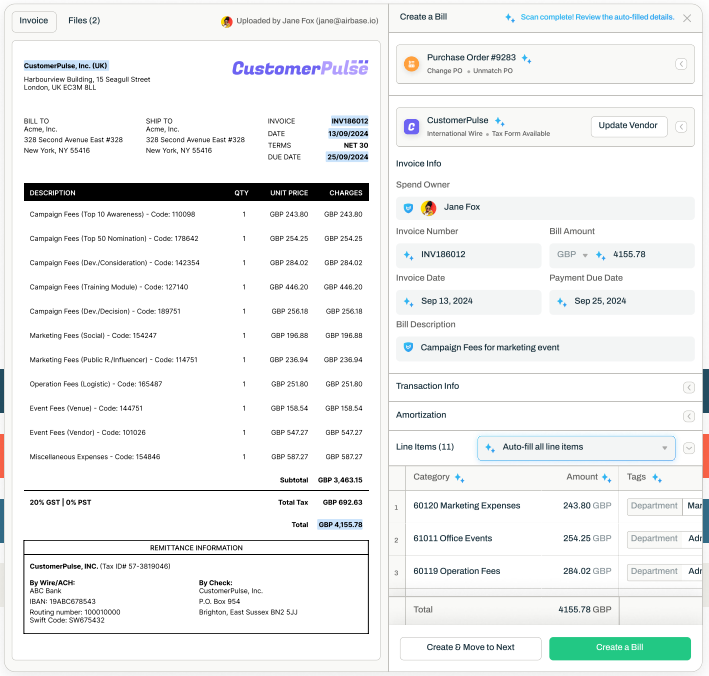
Postman

## How it works:

1. Quickly convert an invoice into a bill using a specialized and unique email inbox for gathering invoices and documentation — simply upload a PDF into the inbox or open the invoice received from your vendor.
2. No need to enter bill details manually. Airbase instantly scans the invoice and leverages AI to auto-fill all the key details of the bill such as the invoice date, the bill description, line-level coding, and so on.
3. Review the AI-generated auto-fills on the bill as a built-in part of your approval workflow using Slack, desktop, mobile, or email to comment on, edit, and approve or deny bills.
4. Sync transaction details to the GL, regardless of the payment method, either at bill creation or bill approval.



### Use case example:

An emailed invoice is converted into a bill within Airbase, attaching all relevant documentation. It's then paid, either via ACH or via virtual card to earn cash back.

Airbase modern spend management combines guided procurement, accounts payable automation, expense management, and corporate cards. It's the best way to control spending, close the books faster, build a culture of compliance, and make teams more productive. Airbase brings efficiency to approvals, accounting, and payments with a process employees love.
